

Pick Ups Online – Environmental Policy

Pick Ups Online services a diverse customer base providing freight and courier solutions where bookings are made online.

At its onset the founders of Pick Ups Online were focused on creating a business with a high degree of efficiency and automation, and the environmental aspects of this were included in its development plans.

The management of Pick Ups Online is committed to:

- continually monitor and improve the impact on the environment with regard to its operations directly and indirectly;
- promote and manage a policy of prevention as apposed to disposal in relation to the use of materials, fuels and energy, and where not practical, a commitment to recycling where feasible;
- foster a strong environmental ethic as part of its culture;
- consider favourably, suppliers who pursue good environmental management practices;
- comply with all relevant environmental legislation and regulations and maintain open and constructive communication with government authorities and the community in general;
- education and training

The environmental policy shall be coordinated with the OH & S policy and communicated in company documents, training and displayed on the Pick Ups Online web site.
